Architectural Works:

An architect's major contribution to the public and to the profession typically occurs through built work. It is through the actual construction of projects that artistic or innovative ideas, environmental concerns, or personal philosophy of architecture may be tested.

As a member of the firm **Simon, Rettberg, Garrison, Flom, Architects** of Champaign, Illinois, I acted as Chief Designer, Head of the Design Department, and Associate Partner. My primary responsibilities were in the creative design area, but my position also demanded considerable time in other areas of architectural work. In the course of my tenure at SRGF, I contributed to over 200 different architectural projects, 90 percent of which were constructed. After joining the faculty of the University of Illinois, I continued a limited, but equally creative architectural practice from 1975 to the present. The following represent a range of my built architectural works over time.

American Lutheran Church (1966), Rantoul, Illinois; **Addition to Champaign Country Club** (1966), Champaign, Illinois; **General Telephone Company** (1967), Princeton, Illinois; **McCulley-Tummelson Apartments** (1970), Urbana, Illinois; **Mt. Carmel Library** (1972), Mt. Carmel, Illinois; **Lincolnwood High School** (1972), Raymond Illinois. Simon, Rettberg, Garrison, Flom, Architects; James P. Warfield, Chief Designer. These five buildings--a new high school, a new public library, a four-unit townhouse complex, a telephone operations facility, and a new sanctuary and classroom addition--are representative of my work with SRGF architects between 1966 and 1972. As **Chief Designer** for the firm, I was responsible for the complete architectural design (schematic through developmental) for a wide range of projects. On the five projects above, I was also responsible for following through with my design as team leader for the production team responsible for producing contract documents for each project.

Addition to First Presbyterian Church (1972), Charleston, Illinois. SRGF Architects; James P. Warfield, Head of Architectural Design. On this major addition of classrooms and a Fellowship Hall, I was responsible for achieving a contemporary design for a secondary facility which appropriately respects the existing neo-classic sanctuary.

Nuttal Middle School (1972), Robinson, Illinois. SRGF Architects; James P. Warfield, Head of Architectural Design. I was the Principal Design Architect for this 66,000 sft

open plan school. The final design was the result of extensive research in open planning and team teaching. In the academic sector of the school, twelve open classrooms focus inward upon a "learning center." Nuttal became a model for numerous SRGF open plan designs. This project was selected for exhibition in **Chicago, New York, Dallas, and Basel, Switzerland.**

Temple Baptist Church (1973), Champaign, Illinois. SRGF Architects; James P. Warfield, Head of Architectural Design. As Project Architect for this new sanctuary, I worked with the congregation for over four years to achieve a quality architectural solution within a modest building budget.

Commercial Bank of Champaign (1975), Champaign, Illinois. SRGF Architects; James P. Warfield, Head of Architectural Design. On this new bank and office building, I served as Principal Design Architect. I, SRGF, and the Commercial Bank considered this project an important indication of support for and an investment in the city's central business district. The project was awarded a **Certificate of Merit by the CCDC.**

Porta Jr.-Sr. High School (1976), Petersburg, Illinois; **Mt. Zion Jr. High School** (1975), Mt. Zion, Illinois; and **Gibson City Middle School** (1975), Gibson City, Illinois; **Monroe Elementary School** (1971), Casey, Illinois. SRGF, Architects; James P. Warfield, Head of Architectural Design. These four projects (60,000 to 120,000 sq ft; \$2.0 to 3.4 million) are typical of a number of new public schools I designed between 1971 and 1976. As Principal Design Architect for SRGF, I developed a specialty in open plan schools and designed over twenty such facilities to accommodate the "**team teaching**" educational concept.

Dunlap High School (1977), Dunlap, Illinois. SRGF Architects; James P. Warfield, Head of Architectural Design. As Principal Design Architect, I was responsible for the architectural programming, master plan, and complete architectural design for this new 100,000 sq ft, four-year high school. I developed a structural concept based upon standard prefabricated steel rigid frames which allowed significant economic savings as well as considerable creative architectural expression. This project was selected for national exhibition by the American Institute of Architects.

Arby's Restaurant (1977), Decatur, Illinois. James P. Warfield, Architect. In 1976 the firm of James P. Warfield, Architect, was awarded the contract to provide full architectural services to design one of three "non-prototypical" Arby's in Illinois. This project attempted to relate a corporate image to a conservative Midwest community by employing an architectural vocabulary based upon the familiar regional vernacular.

Savon Showroom (1982), **The Furniture Center** (1983), **Franchise Management Systems Offices** (1978), and **Stonegate Stables Renovation** (1981), Champaign, Illinois. James P. Warfield, Architect. These four projects represent efforts to introduce appropriately scaled and architecturally sensitive commercial facilities adjacent to and within a residential community. The Savon Showroom received a **Certificate of Merit** in the 1982 CCDC Foundation Site Development Awards Program.

Stonegate Village (1976-1983), Champaign, Illinois. James P. Warfield, Architect. A multi-family residential complex designed and built over a seven year period. Located on the site of the old Stonegate Stable, the complex includes 185 units, stables renovated as community and recreational facilities, a pool, and support buildings. In

1982, Stonegate was cited by the Champaign County Development Council as the **best multi-family residential site development between 1977 and 1982**.

St. Malachy Elementary School (1989), Rantoul, Illinois. James P. Warfield, Architect. Daily and Associates, Engineers. Master Plan for existing educational and community facilities and design for a new community commons. Received an **Award of Excellence in Site Design** from the Champaign County Development Council in 1990.

Scott Building Renovation (1984), Champaign, Illinois. James P. Warfield, Architect. Reclamation and renovation of an historically significant landmark built in 1894. Fronting a community park, the Scott Building had been slated for demolition.

The Mow Units (1984), Champaign, Illinois. James P. Warfield, Architect. An eleven-unit apartment building designed and built to replace the burned barn which was the focus of Stonegate Village and to retain the rural vernacular noted in the 1982 **Champaign County Development Council (CCDC) Foundation award citation**.

Friends Meeting House (2002-2004), Urbana, Illinois. James P. Warfield, Architect, with the Potter Design Group, Madison, Wisconsin. A new house of worship and assembly for the Quaker community. Received the **2005 PACA Heritage Design Award** from the Preservation and Conservation Association for “constructing an environmentally sensitive and historically respectful building.”

St. Malachy Gymnasium and Pre-School (2002-2005), Rantoul, Illinois. James P. Warfield, Architect. Daily and Associates, Engineers. A new elementary school gymnasium, campus master plan and renovation of old gymnasium into modern pre-school facilities.
